

Joseph Szymczak

Joseph Szymczak is an expert at design project management. He works globally to bring Voices of the Earth imagery to the attention of architects, interior designers and art consultants. Joseph has extensive experience in design in the Middle East and specializes in our projects in that region.

Joseph spent 9 years in the Gulf region executing large scope turn-key furnishing contracts. He has extensive experience in global sourcing, custom furnishing development, negotiating and managing installation logistics of global production. His work has also included specification, logistics, procurement and installation for furnishings, art and decorations.

In the past Joe has been responsible for the design department of the American Gallery, Jeddah KSA, supervising project development of regional and global projects including VIP residential, royal private projects, and governmental municipal sites.

Joseph has been the lead designer managing interior development, design and furnishing of Royal Suite hospital rooms for *Saad Specialists Hospital*, Al-Khobar KSA as well as various VIP off-site accommodations on the hospital campus.

Joseph served as lead designer for various luxury resort beach compounds on the Red Sea managing interior furnishings and decoration development of villas, chalets and common areas for VIP and ex-patriot accommodations

Joseph has completed interior designs for private residential villas worldwide, palace compound buildings and public airport VIP waiting areas.

Joseph has supervised product manufacturing in the Philippines, China, Italy, India, France and the United States. He has also created multiple retail boutiques in Saudi from concept development through site location and purchasing.

Most recently, Joe has been a designer serving the residential interior design market in the United States. He currently publishes “Designer on Design” a web platform for design editorial.
